

PlanSight AI

Brand Guidelines

Your project plan, finally legible.

01

Brand essence

From dense plans to clear sight.

PlanSight AI is not a project management tool. It is a lens — a visibility, analysis, and communication layer over the project plans PMs already have. The brand should feel calm, analytical, and confidence-inspiring, not busy or productivity-app loud.

Think Linear or Vercel's restraint, with the trustworthy authority that executives and senior PMs respond to. Quiet intelligence, not loud cleverness.

Voice

Write like a trusted senior PM — calm, specific, slightly technical when it matters. Avoid startup hype. Avoid marketing adjectives. Use concrete nouns and active verbs. When in doubt, cut it in half.

Do say	Don't say
Upload your .mpp file.	Unleash the power of AI for your project!
Computed per PMBOK conventions.	Industry-leading, best-in-class analysis.
Share a link your stakeholders can open.	Revolutionize project communication.

02

Logo system

PlanSight uses a **combined** logo system: a horizontal wordmark tells the brand story, and a square monogram serves as the app icon. They share the same visual DNA — a horizontal element resolving into a focused circle — but each is optimized for its own context.

Wordmark

The primary lockup. A Gantt-bar element resolves into a focused eye — the schedule meeting clarity. Sight carries the brand color because it is the differentiator; Plan stays muted to let the eye land where the meaning lives.

Monogram

An app-icon-first mark: a dark navy rounded square holding a bracket (the plan frame) with a sightline punching through to a focused eye. Built to scale — it works at 180px and at 16px.

03

Wordmark variants

Primary — light backgrounds

File: plansight-logo-primary.svg

Primary — dark backgrounds

File: plansight-logo-primary-dark.svg

Stacked lockup

For square spaces, social avatars (LinkedIn, GitHub org), and centered hero placements where the horizontal lockup would feel awkwardly wide.

plansight-logo-stacked.svg

04

Monogram at size

The monogram appears as a favicon, app icon, and in-product nav element. At $\geq 64\text{px}$ it shows the full bracket-and-eye composition. At $\leq 32\text{px}$ it simplifies to its essential gesture: sightline + dot. This is intentional — the bracket would mush at small sizes, and clarity matters more than completeness.

Variants

Dark

`plansight-monogram-dark.svg`

Default. Use on light pages and in-app dark surfaces.

Light

`plansight-monogram-light.svg`

For white backgrounds where the dark square would feel heavy.

Simplified

`plansight-monogram-simplified.svg`

For $\leq 32\text{px}$ contexts. Sightline + dot only.

05

Color

A deep navy foundation with a single confident accent. The cyan does double duty: it reads as intelligence/AI without being the overused purple-gradient cliché, and it visually echoes the timeline feel of a Gantt chart.

Brand

Deep slate Primary surface	Slate 800 Secondary surface	Sightline cyan Primary accent	Cyan dark Wordmark accent
#0B1220	#1A2332	#22D3EE	#0891B2

Neutrals

Slate 100 Text on dark	Slate 400 Body muted	Slate 500 Wordmark 'Plan'	Ink Text on light
#F1F5F9	#94A3B8	#64748B	#0B1220

RAG status

Used for the project health indicator and at-risk/late task badges. Match the deterministic insights engine output exactly.

Red At-risk, late	Amber Watch	Green On track
#EF4444	#F59E0B	#10B981

06

Typography

Type stack

Headings	Inter, Geist Sans, system-ui, sans-serif
Body	Inter, system-ui, sans-serif
Data & numbers	Geist Mono, JetBrains Mono, ui-monospace

Use the monospace for task IDs, durations, dates, and any PMP-grade computed values in the UI. It reinforces the deterministic, instrument-like positioning.

Scale

Heading 1	32 / 38 / 600
Heading 2	22 / 28 / 600
Heading 3	16 / 22 / 600
Lead — calmer authority.	14 / 22 / 400
Body — the workhorse size for paragraphs and lists. Slate-700 for less stark contrast.	11 / 18 / 400
Caption / muted.	9 / 13 / 400

07

Clear space & minimums

Reserve clear space around the lockup equal to **X** — the height of the dot in the eye. Nothing should encroach on this zone.

Minimum sizes

Primary lockup	96px wide minimum	Below this, switch to the monogram
Stacked lockup	64px wide minimum	Below this, switch to the monogram
Monogram (full)	48px minimum	Below this, use the simplified variant
Monogram (simplified)	16px minimum	Favicon-grade

08

Don't

✗ **Recolor the mark.**

The cyan accent is part of the brand. If you need a single-color treatment, use the monochrome variant — it inherits `currentColor` from CSS.

✗ **Stretch or distort the dot.**

The proportions of the dot to the bar to the eye ring are calibrated. Scale the entire mark, never individual elements.

✗ **Set 'AI' larger than the wordmark cap height.**

AI is a modifier, not a co-equal. Keeping it small preserves the visual hierarchy.

✗ **Place the lockup on busy or low-contrast backgrounds.**

Use the dark variant on dark surfaces, the light variant on light surfaces. Don't let stakeholders cargo-cult the wrong one.

✗ **Add effects.**

No drop shadows, glows, gradients, or strokes. The mark is already complete.

✗ **Compose the mark next to a competing logo without clear space.**

When PlanSight appears alongside a customer's logo or partner mark, enforce the X clear space at minimum.

Asset reference

Every file in the brand kit, what it's for, and where to install it. All paths are relative to the project root.

SVG logos — install to /public/brand/

File	Use
plansight-logo-primary.svg	Primary horizontal lockup, light backgrounds
plansight-logo-primary-dark.svg	Primary horizontal lockup, dark backgrounds
plansight-logo-stacked.svg	Square spaces, social avatars, centered heroes
plansight-logo-monochrome.svg	Single-color contexts. Inherits CSS color: via <code>currentColor</code>
plansight-monogram-dark.svg	App icon — dark surface
plansight-monogram-light.svg	App icon — light surface
plansight-monogram-simplified.svg	Tiny-size variant for ≤ 32 px contexts

Favicons — install to /public/

File	Use
favicon.ico	Multi-resolution (16/32/48) for legacy browsers
favicon-16.png	Smallest tab favicon
favicon-32.png	Standard tab favicon
favicon-180.png	apple-touch-icon for iOS home screen
favicon-192.png	Android home screen / PWA
favicon-512.png	PWA splash screen
site.webmanifest	PWA manifest pointing at the icon set

10

Installation

In **app/layout.tsx**:

```
export const metadata: Metadata = {
  title: "PlanSight AI",
  description: "Upload, visualize, share, and understand project plans with AI in sights.",
  icons: {
    icon: [
      { url: "/favicon.ico", sizes: "any" },
      { url: "/favicon-32.png", type: "image/png", sizes: "32x32" },
      { url: "/favicon-16.png", type: "image/png", sizes: "16x16" },
    ],
    apple: { url: "/favicon-180.png", sizes: "180x180" },
  },
  manifest: "/site.webmanifest",
  themeColor: "#0B1220",
};
```

Wordmark in components

```
import Image from "next/image";

// Light/marketing context
<Image
  src="/brand/plansight-logo-primary.svg"
  alt="PlanSight AI"
  width={160}
  height={32}
  priority
/>

// Dark hero/footer
<Image
  src="/brand/plansight-logo-primary-dark.svg"
  alt="PlanSight AI"
  width={160}
  height={32}
/>
```

End of brand guidelines. Questions or proposed updates: open a ticket against the marketing site repo with the brand label.
